

Child Check-In System for Your Nursery

Simple – Safe – Affordable

Not ready for a computerized check-in system with database integration? You're not alone. Over 7,000 church nurseries and daycare centers, large and small alike use our Nursery Security Labels. Even if you have a digital paging system or number boards, our security labels will make the process simpler.

Simple, safe and secure at an affordable price, that's what it is all about. A box of 800, 2-part custom nursery labels cost \$86.00. Compare that to a typical paging system that can cost more than \$2,000 for a small church. Parents and Caregivers alike love our labels and how simple they are to use. What our customers are saying...

"We love them and think they are wonderful." - "We tried several different security systems when we first started. Anyone could walk in off the street and pick up a child. Now, parents must have claim tag to pick up their child. If they don't, they have to wait until all the other children are picked up, and then present their license for identification." Tina Goodwin, Preschool and Nursery Director, Living Stones Christian - Chesapeake, VA

Our flexible numbering templates make it possible for us to meet your special needs, even if you use a digital number board. Some churches use different number ranges for different rooms such as 100-199 for the one-year-olds, 200-299 for the two-year-olds and so on. It is also common for churches to have several different label designs with different colors or number ranges.

Types of Security Labels

- **2 - Part Label "Stock"** - The 2 part label set includes a large label that provides space for information and (1) adhesive stub. The dimensions of these labels are 2 1/8 inches by 5 1/2 inches.
